Moodle health check

Link your VLE to SIMS and save time on administration

Moodle health check

Is your Moodle slow and unresponsive, do your students and staff rarely use it, does it desperately need filling with engaging content?

Don't worry if you answered yes to any of the above, many schools are in the same position as you and we can help.

What you need is a Moodle Health Check – a review of how your Moodle performs and looks, how it is used and how it fits into your overall ICT strategy.

One of our team of e-learning specialists and Moodle experts will carry out your Moodle health check. They will visit your school and through some informal chats and analysis of your VLE will make suggestions of how you could gain more value from your Moodle investment.

A Moodle health check will review the following:

- Theme design
- Blocks/add on usage
- Integration with other software e.g. MIS
- CPD/teacher training
- ICT strategy
- Moodle content
- Moodle Reporting

If you are interested in a Moodle health check for your school or just want to find out more about it, please call **Mike Bennett** on **0800 862 0491**.
